

## CSC 469 Homework #3

Jeez, you think I'm cranky... Kurose was on a tear when he put his Chapter 3 problem set together. Yikes!

So, we'll take it easy on the textbook problems, starting at page 287:

- Problem 3... on checksum
- Problem 6... on rdt 3.0 (hint: it's sort of a trick question)
- Problem 11... on a NAK-only protocol
- Problem 19... true/false

Please complete the Ethereal lab on TCP. I'll have handouts ready at class, though they're at the textbook web site as well.

As before, for the Ethereal lab, you can write your answers right in the margin of the lab handout. If the lab calls for saving a screen shot or file, that is your call. I won't need to see it. Spend your time on Program #2.

thanks... yow, bill
