

CSC 469 Homework #4

Chapter 4 review:

- Complete the “Review Problems and Questions” for sections 4.1 - 4.6 on pages 400-402. Just jot down an answer, or more importantly, highlight the questions where you are lost.
- Answer the following “Problems” starting at page 403: 7, 8, 10, 12, 21, and 23

I am not asking you to complete the Ethereal lab this chapter. It uses traceroute to show the ICMP protocol. I didn't think it was that interesting. We'll do the Ethernet lab for Chapter 5, for sure.

thanks... yow, bill
